

Research Proposal

Project Title

Proposer Name

Executive Summary

Should not go beyond this page

Research Problem

Be clear about what exact problem you aim to solve. Why is the problem important? What are the challenges?

Literature Review

How have others tackled the same or similar problem? Position your proposed research against them.

Proposed Approach

Write a concrete and detailed idea of your solution and methodology. Why do you think it could solve the problem? How is it different from existing work? Provide preliminary results if you have them.

Plan & Deliverables

What do you plan to achieve? How would you know whether you have succeeded? What is your plan (and timeline) of taking it from your idea to that destination?
